

## LED Lightsource LED-030W/DMX

### FEATURES

The new 30W /DMX GP Fiber Optics LED light source is a high lumen one and can replace old halogen light sources with color wheels.

The 30W Led array has been designed and driven to a lower current to a LED power of around 24W in order to get a silent light source with lower heat and hence requiring no fan.

The light source has a digital display on the rear side enabling manual control or via industry standard DMX512, 6 channels, incl. dimming. A remote RF control is an option available.

### TECHNISCHE INFORMATIONEN

-LED Light source	24 W Led Array
-Color temperature 1	3000K
or	
-Color temperature 2	6000K
-Color temperature & Lumen	3000K-2000lm
-Power supply	100-240VAC 50-60Hz (El. Power 30W)
-Cooling	Passive cooling, no fan
-Common End	30mm, for Glass or PMMA Fiber
-DMX 512	Dimming or Strobe
-DMX Setting	4 digits display with setting buttons on rear side
-DMX Connection	RJ45 (Master/Slave)
-Operation temperature	-10 +45°C
-Protection grade	IP20
-Case	Metal
-Finishing	black
-Dimensions	235x140x80mm
-weight	2,15kg
-Standards	CE
